DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I and Species A (claims 1, 2, 4, and 11) in Paper No. 8 is acknowledged.

- Claims 3 and 5 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made without traverse in Paper No. 8.
- 3 Claims 6-10, 12, and 13 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Election was made without traverse in Paper No. 8.

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description: 10 (Fig. 2). A proposed drawing correction, corrected drawings, or amendment to the specification to add the reference sign(s) in the description, are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 103

- 6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
 - 8. Claims 1, 2, 4, and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sakuma (US SIR H1201) in view of Hosoi *et al.* (US 4,880,987) and Verbeke *et al.* (US 5,519,229).

In regard to claim 1, Sakuma discloses (Fig. 3) a radiation imaging panel (3, 5, 7) having a rectangular shape, wherein the shape of the radiation imaging panel is asymmetric with respect to a center axis of the radiation imaging panel, which center axis extends in an antero-posterior direction of the radiation imaging panel. The radiation imaging panel of Sakuma lacks that it is a radiation image storage panel comprising a transparent substrate and a stimulable phosphor layer overlaid on a front

Application/Control Number: 09/804,080

Art Unit: 2878

surface side of the transparent substrate. Radiation image storage panels are well known in the art. For example, Hosoi *et al.* teach (Fig. 5; column 6, lines 14-17) a radiation image storage panel (1) comprises a stimulable phosphor layer (1B) overlaid on a front surface side of a transparent substrate (1A) and Verbeke *et al.* teach (in the description of the prior art from line 15 in column 1 to line 13 in column 2) it is known in the art that for radiography, a radiation image storage panel offers the advantages of re-usability and better image resolution at lower dosages for a patient and that typically the radiation image storage panel is used within conventional X-ray photography cassettes. Therefore it would have been obvious to one having ordinary skill in the art to substitute a radiation image storage panel for the radiation imaging panel of Sakuma, in order to obtain better image resolution at lower dosages for a patient.

In regard to claim **2** which is dependent on claim 1, Sakuma also discloses (Fig. 3) that a shape (I) of one corner area, which is among four corner areas of the radiation imaging panel (3, 5, 7), is different from shapes of the other three corner areas.

In regard to claim **4** which is dependent on claim 1, Sakuma also discloses (Fig. 3) that one of a cutaway region, a projecting region, and a hole is formed only at one corner area, which is among four corner areas of the radiation imaging panel (3, 5, 7), or in the vicinity of the one corner area.

In regard to claim **11** which is dependent on claim **1**, Sakuma also discloses (Fig. 3) a cassette (4, 6, 8), comprising an accommodating section for accommodating a radiation imaging panel (3, 5, 7) as defined in claim 1, wherein the accommodating section has a shape (I') such that, due to the asymmetric shape of the radiation imaging

panel (3, 5, 7), the radiation imaging panel (3, 5, 7) is prevented from being accommodated in the accommodating section with a front surface and a back surface of the radiation imaging panel (3, 5, 7) being reversed.

Conclusion

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shun Lee whose telephone number is (703) 308-4860. The examiner can normally be reached on Tuesday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Porta can be reached on (703) 308-4852. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9318 for regular communications and (703) 872-9319 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
